Components

👤 1.Patient Module + AI Symptom Checker (Sinali)

🔹 **Basic (you MUST have)**

- Register/login
- Profile
- Upload reports

🔥 **Advanced Features (ADD THESE)**

- **Health Timeline Dashboard**
  - Visual history of visits, prescriptions, reports
- **Medical Report Analyzer (AI-lite)**
  - Extract key info from PDFs (e.g., blood test values)
- **Patient Risk Score**
  - Calculate risk level (e.g., diabetes risk based on inputs)
- **Multi-profile support**
  - One user managing family members
- **Reminder System**
  - Medication reminders / appointment reminders

👉 This makes your patient module feel like a **real healthcare app**

👩‍⚕️ 2. Doctor Module + Prescription Management Service (Vidushi)

🔹 **Basic**

- Profile
- Availability
- Prescriptions

🔥 **Advanced Features**

- **Smart Scheduling**
  - Auto-suggest available slots based on load
- **Patient Insights Dashboard**
  - Show patient history summary before consultation
- **Voice-to-Prescription (cool feature)**
  - Doctor speaks → system generates prescription
- **Doctor Rating & Feedback System**
  - Patients can rate doctors
- **Earnings Dashboard**
  - Track income from consultations

👉 Now it looks like a **professional doctor platform**

🗓️ 3. Appointment + Payment Module (Sithmi)

🔹 **Basic**

- Book appointment
- Cancel
- Payment

🔥 **Advanced Features**

- **AI-based Doctor Recommendation**
  - Suggest doctors based on symptoms/history
- **Queue Management System**
  - Show live queue position (like hospital token system)
- **Dynamic Pricing (optional)**
  - Different fees for peak times
- **Rescheduling Intelligence**
  - Suggest best alternative slots automatically
- **Payment History + Invoices (PDF generation)**

👉 This shows **business logic maturity**

🎥 4. Telemedicine Module + Analytics & Admin Service – (Geethma)

🔹 **Basic**

- Video consultation

Dashboard:

- Total users
- Appointments per day
- Revenue tracking

🔥 **Advanced Features**

- **Chat System (before/after consultation)**
- **File sharing during consultation**
- **Session Recording (optional)**
- **Live Notes during consultation**

👉 This becomes a **real telemedicine system**
